

# Matthew H Secret

## About Me

Epidemiologist, data scientist, developer. Master's in Epidemiology from McGill. Coauthor of many peer-reviewed publications. Interested in epidemiologic and biostatistical methods and building software to implement them. Experienced with diverse real-world data sources (EMR, claims, next-gen sequencing) as well as clinical trial data. R, python, SQL, STAN, Java, C.

## Technical Skills

**Domain Expertise:** Epidemiology and study design, oncology, drug development, biostatistics, data quality, machine learning, modeling, visualization, data wrangling

**Languages:** R (tidyverse, shiny), SQL, Python (Pandas), Java, STAN, C

**Data Visualization:** ggplot2

**Version Control:** git

## Education

**Master of Computer and Information Technology** | University of Pennsylvania | ongoing (2025)

**Master of Science, Epidemiology** | McGill University | 2016

**Bachelor of Science, Chemistry** | Wake Forest University | 2010

## Experience

### **Principal Data Scientist | Genentech | 8/2024 - Present**

Design and execute real-world/observational epidemiologic studies using EMR, claims, and NGS data to support product development in oncology. Develop dashboards and R packages (e.g., [psborrow2](#)) to improve research reproducibility and efficiency.

### **Senior Data Scientist | Genentech | 10/2021 - 8/2024**

### **Data Scientist | Genentech | 3/2020 - 10/2021**

### **Clinical Data Scientist | Verana Health | 11/2019 - 3/2020**

Designed and executed real-world data epidemiologic studies in ophthalmology and neurology using proprietary EMR data. Mapped unstructured EMR data to structured clinical features.

### **Fellow | The Data Incubator | 9/2019 - 11/2019**

Participated in an advanced, 8-week data science program designed to transition academic researchers to industry research. Created a Heroku app to predict the likelihood of drug approval from a clinical trial abstract using natural language processing.

### **Consultant | IQVIA | 8/2017 – 9/2019**

Designed and managed studies of drug safety and effectiveness in secondary datasets for market access (single arm, historical comparator), label expansion, and post-marketing surveillance. Researched rare disease prevalence through literature reviews and steady-state disease modeling. Evaluated risk evaluation and mitigation strategy effectiveness.

### **Research Assistant | Lady Davis Institute | 7/2016 - 7/2017**

Developed a method for a unique missing data problem in distributed data and evaluated its effectiveness in >1000GB of simulated patient-level data via a super-computer and in real EMR data from 59,957 patients in the UK. Designed a study advocating for increased study population restriction to reduce bias.

**Research Assistant | Jill Baumgartner's Group | 8/2014 – 6/2016**

Conducted household air pollution measurements in China, creating an R program at the field site to convert raw sensor data from to climate modeling inputs. Analyzed the composition of 20 air pollution samples to identify pollution sources that generate high oxidative potential with factor analysis.

**Senior Media Analyst | iCrossing | 11/2012 – 7/2014**

Analyzed marketing data using a proprietary software.

**Research Fellow | New York University | 8/2011 – 8/2012**

Developed methods for chemical synthesis and instructed classes and laboratories.

**Fulbright Fellow | US Department of State | 9/2010 – 5/2011**

Taught English to French high schoolers and conducted sociologic researched informed by primary data collection.

**Publications**

**Peer-reviewed manuscripts**
